

## FRONTEND / WEB DEVELOPER (m/w) full time at EDU

We are looking for an ambitious **FRONTEND / WEB DEVELOPER**. You will work on multiple fast-paced projects that span all phases of the software development lifecycle, working closely with design and development to build the platform and enhance it with viable, data-driven solutions according to user needs.

### About us

EDU is a brand of Digital Education Holdings Ltd. (DEH), a private institution of higher education with a vision to substantially increase the quality and accessibility of education.

In line with the United Nation's Fourth Sustainable Development Goal, EDU focuses on social impact for higher education by boosting societal participation, lowering barriers to formal education and addressing the capacity constraints to higher education in developing countries.

We are a young company with a team of passionate founders and leadership with broad experience across the fields of education, technology and international relations. With a rich partner ecosystem, we are building degree programmes that rely on European traditions, instilling in our graduates a strong sense of responsibility.

If you share our commitment in shaping the future of education, we invite you to join us on this journey.

### Who we're looking for

- Strong communication skills – you can verbalize problems you are facing and ask for help when you need it
- Excited to learn about new technologies and to apply them to a challenging environment, such as building and integrating APIs, using best practices to ensure optimal results
- Able to work independently and you can organize, estimate, and prioritize project tasks yourself
- Capable of making your own decisions but understand the value of team play
- Have a strong knowledge of current trends in your area of expertise and in server-side technologies, in addition to the fundamentals. However, you're also business oriented and understand the dynamics between product, marketing and design
- Comfortable with working in cloud environment with continuous integration and delivery

- Proficiency in script languages and frameworks (JavaScript, CSS3, HTML5, jQuery, Angular) – at least 4 years of experience
- Proficiency with at least one programming language (PHP, C# or comparable, and/or Java) – at least 4 years of experience
- Experience in programming with databases and database modeling (SQL Server, Oracle and/or MySQL)
- Experience with source code management and continuous integration tools: Git, SVN, CircleCI, TeamCity, etc.
- OutSystems development experience or even certification is a plus
- Work with test automation tools like Katalon Suite is a plus
- Degree in Computer Sciences or Engineering

## What we offer

- Being a vital part of building up an innovative social business;
- Personalized learning plan in line with your goals, with weekly and monthly check-ins and feedback;
- Opportunity to do meaningful work from day one, and gather first-hand experience and insights across departments;
- Competitive salary package;
- Work closely with experienced professionals at the top of their industries.
