

DATA SCIENTIST INTERN (m/w) at EDU

About us

EDU is a brand of Digital Education Holdings Ltd. (DEH), a private institution of higher education with a vision to substantially increase the quality and accessibility of education.

In line with the United Nation's Fourth Sustainable Development Goal, EDU focuses on social impact for higher education by boosting societal participation, lowering barriers to formal education and addressing the capacity constraints to higher education in developing countries.

We are a young company with a team of passionate founders and leadership with broad experience across the fields of education, technology and international relations. With a rich partner ecosystem, we are building degree programmes that rely on European traditions, instilling in our graduates a strong sense of responsibility.

If you share our commitment in shaping the future of education, we invite you to join us on this journey.

Who we're looking for

- You have a strong background in mathematics and statistics
- You understand statistical and technical methods to produce relevant insights out of massive amounts of data
- You have programming skills in Python or similar scripting language
- You already worked with Machine Learning tools and environments
- You can multitask, switch priorities, and be flexible
- You jump at the opportunity to collaborate with colleagues
- You are focused on achieving defined results, and exceeding goals and objectives
- You thrive in a fast-paced environment while working with a diverse team

What will you do

Data-driven product management is key for being successful in the digital education business. The Data Science Intern is supporting Product Management with data preparation, development of analytical models, and data visualization. Example projects include:

- Support marketing team in web traffic analysis
- Design analytical models to measure user behavior on learning platform
- Create dashboard for core KPIs of our application process

What we offer

- Being a vital part of building up an innovative social business
- Personalized learning plan in line with your goals, with weekly and monthly check-ins and feedback
- Opportunity to do meaningful work from day one, and gather first-hand experience and insights across departments
- Work closely with experienced professionals at the top of their industries
